With regulators scrutinizing banks' risk management programs, it's a crucial time to explore the opportunities and impact of risk management. An infrastructure that gives banks a comprehensive view of risk could help achieve organizational objectives, preserve stakeholder value and provide a more stable bank operating system

This webinar, which is part of a series created by **Barack Ferrazzano, RSM McGladrey**, and **Howe Barnes Hoefler & Arnett** to help banks in this challenging environment, will provide an overview of key bank risks, operational risk measures, risk position, key controls and monitoring procedures. Topics include:

- Board and senior management oversight
- Risk measurement, monitoring and management
- Credit risk and liquidity risk management
- Information technology risk, controls and "red flag" rules

Barack Ferrazzano is a law firm with one of the largest practice groups in the nation devoted to serving regional and community financial institutions. The firm has represented more than 250 financial institutions across the country in recent years. Our Financial Institutions Group handles the entire spectrum of the unique legal needs of financial institutions, including an extensive regulatory enforcement and corporate finance practice.
